Ah, if you've been passing through Lord the swinging gate

Chances are you look behind you and wonder where you are

And wonder where you are

Ah to know another man's heart to know him through his pain

To know him through his happiness

Then you can truly smile, then you can truly smile

No it's not not just what you say

No it's mostly how you feel it

And it's not how much you spend

No it's mostly where you lend it

Ah I look around me every morning

So many love so many still on top of that thing

And I have to wonder truly wonder truly wonder

You care much about life to fall off and start again

Ah keeps me runnin' it keeps me hidin'

It keeps me peepin' but Lord don't you know sometimes you find it

It keeps me slippin' and slidin'

It keeps me runnin' and hidin'

Peepin' and a findin'

Ah I know I don't have that much love to give

Oh but I'll find a way to try

If that gate ain't swinging low

I got the key in my heart to try

Ah if you been passin' through that swingin' gate

Chances are you looked behind you and wonder where the hell you been goin'

Where you are and why you'll carry on.

Lord your mind wants to die but your heart keeps yelling back

"Buddy keep going"

Those voices from the sea keep calling out: "Don't let us down"

The wind's gonna howl and the baby's gonna cry
Keep runnin' and hidin' now, peepin' and a findin'
Slippin' and a slidin' runnin' and a tryin'
Keep on tryin'

Ah now the room keeps buzzin' yes
It's like a beehive in the forest when the bears are down
Lord it hates to be caught hates to be brought down
I ain't gonna suck the life from you
Lord I got my roots back home
And I just tear on borrowed time
Just thought I passed by and say hello friend
It don't feel the same way I do
Think after that
You see I'm just a rusty henge
Keep on runnin' keep on listen to your heart
Ah listen to your heart
Don't take the sparkle out of those little children's eyes
Let them run and play let them run and play
Soon enough to be just like you
