Teach me how to live
Teach me how to live without
There's only one thing I can't do without
Look at you and me now

Teach me how to live
I will teach you how to laugh
It's so very sad, when people drift apart
And how they sometimes break your heart

We all need love
You and I, whisper one sweet love
There will shine
I need to spend sometime with you my love
I can't go on, I have to go on

Show me how to live
Show me how to live without
There's only one thing I believe, I belong to
Look at you and me now

Teach me how to live
Teach me how to live without
It's so very sad when people drift apart
And how they sometimes break your heart

We all need love
You and I, whisper one sweet love
There will shine
I need to spend sometime with you my love
I can't go on, I have to go on

We all need love
You and I, whisper one sweet love
There will shine
I need to spend sometime with you my love
I can't go on, I have to go on
