I hope life is kind to you and makes all your dreams
come true

Let you be wise, beautiful and strong

My only advice to you is don't grow up too soon
cherish your youth for the candle soon fades

Hang on to your innocence

Don't grow up too soon

Don't rush into love let love find you

When you grow up take care with your heart

Hearts are so easily broken

some never heal

so be strong but always be fair

admit when you're wrong but don't let anyone walk all
over you

Hang on to your innocence

Don't grow up too soon

Don't rush into love let love find you

Hold on, always hold on

Hold on to your youth

Hold on, always hold on
