I don't know what you want from me but I decline your
offer of civility
I said, don't want to pursue the obtainable
I just want to do what I want and not look back for
something I don't have

I want something, I want something real
I said I want something, something I can feel
I said don't want this, don't want no games
Don't want shame, fear or ones to blame

I want something, I want something real
I said I want something real
I want something, I want something real
I want something, something I can feel

Don't want to play your games
Don't want to be on losing end no more
What I receive ain't enough to keep me keen so I'm
giving up

I want something, I want something real
I want something, something I can feel
I want something, I want something real
I want something, oh something I can feel

I don't play your games no
I don't want to be your toy
I don't want to be your toy oh oh oh no no oh oh
I said no no no no I won't play no more
I won't play nice
I won't play nice no more
I won't play nice
I won't play nice no more
I won't play nice
I won't play nice no more
I won't play nice
I won't play nice no more
