Baby when you bore of going through the motions  
and need something real, you can call me, you can call  
me anytime

When the nights go longer all the chat gets colder  
and it's harder to hold on to the real you  
you should call me then

Oh when your heart breaks for something you don't  
have  
you know you're always, you're always looking back  
You should call me, you should call me then

Oh yeah you should call me sometime soon  
Oh yeah you should call me sometime soon  
Oh yeah you should call me sometime soon

Baby when the going through the motions seems so  
lonely  
you should call me, don't leave it longer,  
don't leave it a minute more

Yeah I know I'm sometimes oh so bad  
I find it hard to pick up that phone  
but if I knew it was you I'd be there

Baby when you get so bored going through the motions  
you should call me, you should me  
you should call me sometime

call me, you should call me sometime  
you should call me, you should call me sometime soon  
Oh yeah, don't leave me waiting  
give me a call  
when you're ready  
don't want to stray no more  
don't want to be out on this lonely world alone

you should call me when you're ready  
you should call me sometime soon
