You said it  
Now forget it

Like a new student  
challenging blackboards  
Call it a disturbance  
What else are words for?

All your thoughts replaced  
with language of the day  
Used to curse and pray  
Saved by slick wordplay

It's not the first  
or the last  
(or the) worst  
Was the one that means the most  
Here's the one you never wrote

All the loose circuits  
the language of the dead  
Used to curse and bore  
What else are words for?
