Your favorite dreamland, is kiss and tell
You never listen, I told you So you think Im lying?
Oh so now Im lying? So you think Im lying?
it's all, goodbye my friend that's all I know
So you think Im lying? Oh so now Im lying?
So you think Im lying? Its all, goodbye my friend
it's old, you're colder There's some dumbass talking
shit Seriously I need some room to breathe
You bring me down with the force and the sound of my body
falling faster The cast is escaping the mold
Do what your told and live the life of a bastard
I can see the sun is heading out the room
it's beating me too soon It brings me down with it
So you think Im happy? This is what I think of your f*cking happy
There's something you should see, somebody's gotta help me
Help me
