he was standin' in the middle of 6 and 7
he was high as a kite but he knew they said somethin
like this wow wow
dont go with the people if you know that the people
gonna drown
you're just another good-looking dum-dum but you
know you'll be just right
chorus:
she'll give you everything
so extraordinary
ah you could hold it
but you could not put your arms around it
i'll bottle any of these
the opportunity to
try and control it
oh i swear you won't believe
so sign every hided on this line my son
we can do this like the days you call a week and do it all
at ones
if you wanna play the game you know the name it's all
the same to us

i'll take you to another place i'll take you to another
world
CHORUS
this another thing was all done
he had his number ones on
and everything was cold, a touch and all better baby
you know you want some
all the things that we do to get to the goal
to get to the things that we cannot hold when it's over
and a million ways to walk today
believing all the times that it's just ah wrong or right
she'll give you everything
so extraordinary
ah you could hold it
but you could not put your arms around it
