I got no time for the moment
I got no time for the moment
I got no time to sit and watch here
as the time goes right by

I got no time for the moment
I got no time for the moment
I got no time to sit and watch here
as the time goes right by

Well, wake up everyday and say
You realize that everything won't just go your way
You gotta fumble through your time in the sky
And wonder why you say
You started thinkin', you started thinkin'
My, oh my, oh

Well time is always tickin' way,
Just another day,
And everything is goin' down to work
But you got no time to stop and play
I got no time for the moment
Only know the time of the day
I got no time for the moment

I got no time for the moment
I got no time for the moment
I got no time to sit and watch here
as the time goes right by

I got no time for the moment
I got no time for the moment
I got no time to sit and watch here
as the time goes right by

Well, wake up some day soon and say hey
Realize that if I can't make everything go my way
I've got to stumble through
There's something on my mind try'na say hey
And if you think about it,
You started thinkin' 'bout it

My, oh my, oh

Down, down
Take a pound
Everything that I have found
Save some time
Hand me my crown
'Cause all the girls are goin' down
I can't relax when your askin' me,
Asking me,
I got no time to sit and watch

Now time's tickin'
And there's someone down the way
Now time's tickin'
And there's someone down the other way
Now time's tickin'
And there's someone down the way
Now time's tickin'
And there's someone down the other way
Now time's tickin'
And there's someone down the way
Now time's tickin'
And there's someone down the other way
Now time's tickin'
And there's someone down the way
I can't be caught, bought and weighed!

I got no time for the moment
I got no time for the moment
I got no time to sit and watch here
as the time goes right by

I got no time for the moment
I got no time for the moment
I got no time to sit and watch here
as the time goes right by

I think I found a way to get away
I think I found a way to take it through another day
I think I found a way to get away
I think I found a way to take it through another day
