Star bright  
First star I see tonight  
Could you or would you please shine your light  
Shine it so I can see my savior smiling at me  
Star bright  
I hear you once proclaimed  
This is the way, keep on following me  
And at the end of the road will be a baby  
And there in him you'll find  
A love that is truly blind  
Given so from your heart  
That love that light could shine  
Shine shine shine shine  
Star bright  
First star they saw that night  
I am aware that this love is for me  
And that the greatest of gifts is free  
In my heart of hearts is heavy  
Star bright  
If I give you my hand  
Could you or would you please see me through  
I would love to take my heart blue  
And give it to you  
And there in my heart you'll find  
A love that is truly blind  
Given to me so that I can let my light shine  
Shine shine shine shine  
Star bright  
Star bright  
Star bright  
Star bright  
Star bright  
Star bright  
Shine your light
