We've been building this ship for years

'cause the river is made tears

And now we're drifting

down the river of freedom

And now we're on our way

on our way...

The sails are made from our dreams

there'll be better days downstream

And now we're drifting

down the river of freedom

And now we're on our way

on our way...

Please let our spirit last

we're raising up our last mast

And now we're drifting

down the river of freedom

On our way

On our way

On our way
