"Say a prayer"

Visit "[Say a prayer](#)" on MotoLyrics.com

I still remember the nights
When there was darkness in my life
But then You came
Something deep inside me changed, and now I pray
I started to trust without fear
Knowing You'd hold me thru the tears
Because of You
I've learned there's nothing love can't do
So hear me pray
Just a little help is all we need
Just a little light we can see
Just a little faith leads the way

Chorus:
For everyone who's falling in love
For every child that needs a touch
For all of the hopes
And dreams that we share
And for the hearts that cry tonight
I'll say a prayer

How can one voice be heard
I've got to tell the whole world
How much You care
'Cause no one has to walk alone
So hear me pray
Just a little help is all we need
Just a little light we can see
Just a little faith leads the way

CHORUS

I'll close my eyes
While I'm down on my knees
It gives me courage to believe
So I'll keep on believing, I'll keep on believing

CHORUS
