Learn to live, learn to love  
Learn to feel happy  
Learn to recognise  
Where the joy lies  
Learn to sing, learn to move  
Your foot tapping on the side  
You've been watching them  
For all of your life  
And don't let those moments  
Pass you by

You set your slightest step  
To the inside

It's another year  
You're still around  
Can I touch you to make sure  
How you tire of waiting for me  
Don't ever get tired  
Of waiting for me

I've been wanting to  
All this time

You set your slightest step  
To the inside

I've been wanting to  
All this time

You set your slightest step  
To the inside
