

## Tindersticks

### "Show Me Everything"

Visit "[Show Me Everything](#)" on MotoLyrics.com

Complexities Treacheries We watch through glass we  
see nothing  
Latex on the fingertips we touch through glass feel no  
fear  
Out of care out of all scattered like stones (show me  
show me)  
Out of mess  
We could take these stones we could build something  
We could try forever try the same  
Survival lord  
Show me everything (show me show me)  
Show me everything we came for (show me show me)  
So many new moons colours around  
So many new stars guidance  
You show me everything thing we care for  
Get back together, separate Take these stones, build  
something  
Find a wall and get rid of this glass we believe we taste  
Everything we could have had  
Everything that belongs to us  
WouldÂ...  
Take these stones, throw something  
We could separate, we could drop the bomb  
And it makes no odds whatever side youÂ're on  
Back again, hesitate  
The price that holds the very air we breathe  
ThereÂ's you, you show me everything I care for in you  
You show me everything
