Gather round we gonna rock this town  
We bring the sound and you look around  
And wonder we do what we do  
It's all because of you and a heart that's true  
We bring love and we sing love  
And believe in the being that gives supreme love  
We rock notes and we rock folks  
My father gave me dreams and with dreams comes  
hopes  
We write the tunes and we play the tunes  
And we incorporate and deliver to you  
We sing the song with it comes the tone  
You'll be catchin' on and singin along

This is your party, we were just invited  
This is our song, you're invited to recite it  
This is your party, this is our song

Put a smile on your face its your time to fit in  
Into the place, surprised that you could get in  
You're my guest of honor, glad that you could make it  
Beautiful when you smile not as pretty when you fake it  
Now that I got your attention there's some things that  
you should know  
There's a God, you don't ever need to walk alone  
Father of love, Father of my existence  
God of all creation, the Father of my repentance

Glad that you could make it down here with us  
We bring rhythms and beats around here with us  
We bring smiles upon smiles for miles upon miles  
And a heart as big as Texas released from inner Childs
