no, don't you go and open up your eyes  
you'll only see that you're out of time  
and it's better to be caught in a dream  
living a beautiful lie  
it's gonna hit you like a heart attack  
once you find out there's no turning back  
you spend all of these years  
to end up right here  
but where are you at

just stand up  
if you think you're lost  
no you're really not  
can't you see we all are  
right here in the same spot  
now things are gonna get better today  
so let me hear you say

welcome to real world  
(woah)  
welcome to the real world  
(now things are gonna get better today  
so let me hear you say)  
welcome to the real world

i read an article today online  
it's the worst it's the best at times  
holding on to let go & out the window  
the world is just passing you by

don't want to hear that its all gone wrong  
just cause the star that you wished upon  
is falling out of the sky  
you know that's life it happens c'mon

just stand up if you think you're lost  
no you're really not

can't you see we all are  
right here in the same spot  
now things are gonna get better today

so let me hear you say

welcome to real world

(woah)

welcome to the real world

(now things are gonna get better today

so let me hear you say)

so when it feels like they're pulling you under

and you can't breathe

don't have to wonder

it's so easy if you just listen to me

(hey yeah yeah)

(if you just listen to me)

and now it's time for you to open up your eyes

welcome to real world

(woah)

welcome to the real world

(now things are gonna get better today

so let me hear you say) x2

you gotta get up

(get up 3x)

(wake up 3x)

you gotta get up

(get up 3x)

(wake up 4x)

you gotta get up today

you gonna have to wake up

get up and say

(welcome to real world)

get up today

you gonna have to wake up

get up and say

(welcome to real world)

(welcome to real world)
