I'm a cyber-terrorist -  
Just how cool is that!?  
I'm gonna take on the World Bank  
And knock the bastard flat.  
The broadband is my minefield!  
The command prompt is my gun!  
The fact is I'm a dickwad,  
And so very very young.

Number nine your meal is ready

Rebellion's not been tried before,  
Not that I'm aware:  
We're the first in history!  
If not, I wasn't there.  
There was some sort of thing in France -  
My teacher once did speak -  
It can't have ever come to much,  
And I skipped school that week.

Revolution Nine  
No-one's ever thought before  
The thoughts inside my head!  
Revolution Nine  
Before us cyber-terror-kids  
No-one sliced their bread!
