=====

I left home with nothing but a few tears in my eyes  
Now I'm halfway down the interstate past Highway 99  
It's just me and one good wiper blade up against the  
rain

CHORUS:

And I still hear the echoes of those bitter words we said  
I could drive a million miles and never drive them from  
my head  
Those words we said

No matter how I try I can't get far enough away  
Every sad song on my radio sounds like it's custom  
made  
By some devil on my shoulder that keeps whispering in  
my ear

CHORUS

Those words that wounded like an arrow to the heart  
And keep me drivin', drivin'
