Some people think that they've got it all
All they need is themselves and they'll never fall
But I'm here and you're there and you'll never see
What's inside inside me what's been killing me

I guess you don't care anyway

If it's alright with you I think I should just walk away
Cause you hate that but it makes my day

So your thinking everything could be
your wishing everything could be
your hoping everything could be
fine fine fine but it's not (no) no it's not

yea your thinking everything could be
your wishing everything could be
your hoping everything could be
fine fine fine but it's not (no) no it's not

And I guess you don't care anyways

If it's alright with you I think I should just walk away
Cause you hate that but it makes my day
but it makes my day

And I guess you don't care anyways
If it's alright with you I think I should just walk away
Cause you hate that but it makes my day
But it makes my day
