September in the rain - her sweat come a frozen onto  
my skin - Eliminate the outerspace and come and get  
I'm  
swing'n down it again - Synchronize me - fall away - I  
believe that - I wicked on the way look alive now! Yeah!  
Stars explode my eyes - Well, "I been down a long  
time"  
Days crawl away and die "forever is a long time!"  
Remember howling "crazy" like at the moonlight  
superfly - A penetrating powerman "O baby" I'm  
painted  
in the sky - Iron fister - on the  
hour / paralyzing demon - flower  
- Yeah! Stars explode my eyes - "I  
been down a long time" Days crawl  
away and die "forever is a long  
time!" Surround the pain the love's  
insane - got a pseudo-systematic  
gain Careening through the neon  
side - a horizontal "mind collide" -  
Harum scarum holiday - Double  
deal'n on the ones who say

"collapse me with a powerblast"

Ground to zero roll'n fast - Ride

the glide - treasure slide - got a

wooden symbol soul inside - "Freeze"

the heart - a razor tear pack she

doesn't care - If the pillow jacob sky snatch the pad I

don't deny - Been a long time - been a long time - Step  
into

the wind a watch a red girl come alive She scream'n to

the world "I diggin' on the fact that you will not

survive!" Radiate me - walk away - You shook the  
devil's

dig deep hand today - Yeah! Stars explode my eyes,  
Well,

"I been down a long time" Days crawl away and die,

"Forever is a long time!" A million miles an hour - a

million miles an hour - a million miles an hour - let's

get inside
