Everything that keeps me together is falling apart, I've got  
this thing that I consider my only art of fucking people over  
My boss just quit the job says he's goin' out to find  
blind spots and he'll do it  
The 3rd Planet is sure that they're being watched by an eye in the sky that can't be stopped  
When you get to the promise land your gonna shake that  
eyes hand  
Your heart felt good it was drippin' pitch and made of wood  
And your hands and knees felt cold and wet on the grass to me  
Outside naked, shiverin' looking blue, from the cold sunlight that's reflected off the moon  
Baby cum angels fly around you reminding you we used  
to be three and not just two  
And that's how the world began  
And that's how the world will end  
A 3rd had just been made and we were swimming in the  
water, didn't know then was it a son was it a daughter  
When it occurred to me that the animals are swimming around in the water in the oceans in our bodies and another had been found another ocean on the planet given that our blood is just like the Atlantic  
And how  
The universe is shaped exactly like the earth if you go straight long enough you'll end up where you were
