I wanna reach out and touch the sky
I wanna touch the sun but I don't need to fly
I'm gonna climb up ev'ry mountain on the moon,
And find the dish that ran away with the spoon

I've crossed the oceans, turned every bend
I found the plastic at the golden rainbow's end
I've been through magic and through life's reality
I've lived a thousand years, they never bothered me

Got no religion; don't need no friends
Got all I want and I don't need to pretend
Don't try to reach me 'cos I'll tear up your mind
I've seen the future and I've left it behind
