She shone up bright like a knife
Wearing tennis shorts made of stripes
Hand in hand
To the grass we got it right (got it right right right)
Just a glimpse of an ankle and I
react like it's 1805
Swim to the poles just to find the right satellite
It'll take all my strength to give up
But you all know I've tried
So forget about it girl
My head's like a kite
When such a creature I sight

To town!
Where your feet leave not prints on the ground
Have I left my home just to whine in this microphone?
It gets worse every time that we talk
Can't afford to be just one in a flock
But that's your lot
When you're after such a well made lock
Who was classically trained to give up

And my friends know I've tried
So forget about it girl
Even I don't know why
I can't just stay the course
Keep my hands on the wheel
Our detractors were right
My head's like a kite
All my thoughts run astray
and I'm a walking cliché
When such a creature I sight

I can't just stay the course
Keep my hands on the wheel
Our detractors were right
My head's like a kite
