The path i walked in my life
A lonely road i fell under
The spell a long time ago
I searched i looked for hope
No one is there in death
So sweet this sleep i try not to
Care no heartbeat fake smiles
Cold hands in dirt at least i lived
As hard as i could you made my life
Complete you gave me a home slit
The throat drain your blood wash
The hate from the dove do it for me
I will wash it all away you've been
Beaten kill that stray stop that
Crying don't cry out loud you keep
Your silence and wear it proud i can't
Say what i see just because you're
Sellin' me you're not real your face
Is fake the world revolves around
Your fate it's not fair the shit
You do all the pain all that's due
No bullshit hard times for everyone
Everywhere i won't be your dumb machine
No brain no sleep
