I funnel down below
Deep to the ocean floor
Far away from you
Far away
Melt into you
My life is a wasteland
Stare in the light
I tear myself apart
The nights are too long
Blood in my mouth
I stare at eternity
I feel the loss
It continues to haunt me
I feel the loss
It continues to haunt me
True incinerating light
Only you can give
Give me what I need
It was always you
Always you
I wish I was stronger now
Don't see me now
Don't see me now
I can't defend myself
From the lies I told
Where are you now?
You're so far away
In another town
Far from me
We need
Fall apart
Lie
