Well, it was Friday night last week we got pulled over
with an O

53 and Ogden by a condescending po

Tried to fill his quota book

Stopped us no reason just the way we look

We would not let him search the car he said he'd call
his dogs

But we were not worried cause

It was under 30 grams of 40/80 shit

Costly, it was good bud though, I admit

But I don't wanna be a part of it

I will not give in

We must change from within the system

They call us hopeless dreamers

They don't know what we are

Imposing their ancient values

I wonder if they care, I wonder if they care

Then they pulled us out of Cockboy's Caddy-"Hands on
the hood!"

But the piggies didn't find it cause we hid it so good

Pat down I knew he had a wood

Touching me only where my girl should

But I don't wanna be a part of it
I will not give in
We must change from within the system
They call us hopeless dreamers
They don't know what we are
Imposing their ancient values
I wonder if they care, I wonder if they care
Yeah, to fuck with the system you need much wisdom
But first, but first you gotta work with them
Probable cause has definite flaws
It's up to us to change the laws
Your word against mine is your policy
Now, show me where's the legality
When you use your authority
To just instill fear in me
What's up with your power trip?
It was later on that night before they finally let us go
Off to the donut shop and then we blazed half that O
So tough with your fake authority
Some day you'll learn you're the same as me
They call us hopeless dreamers
They don't know what we are
Imposing their ancient values
I wonder if they care, I wonder if they care
