Checkin in, one in a million  
Groups on the air tryin to fill you in  
On a scoop and a time  
With a loop and rhyme  
To get money  
Cause that's rap defined  
In a nutshell  
And this we all know well  
But stil records manage to sell  
Cause people buy em and fly em in a tape  
Usin em as a form of escape  
When time's gettin too tough to take  
You need an outlook (yes I do)  
But not the kind that shock ya  
The kind to lock ya  
In your own little world of reason  
Where you can rest at ease in  
Knowin exactly where is you goin  
No, you can't get lost in the shuffle  
Otherwise you might suffo-  
cate and drown  
Before you get off the ground  
So get your plan down  
(To a what?) To a science

(From downtown)

(Science)

Down to a science, down pat, or just plain (down)  
That's how we got it, comin from the hometown  
Of a sound which some call a trend  
That's cause they just waitin for it to end  
But yo, rap is here to stay no matter who they say it's  
dyin  
Cause the fans keep multiplyin  
So as long as rhymes stay rugged, and beats stay tight  
(What's up?) We aight  
Respond to the vibes picked up in the street  
Where they emanate - we innovate  
And invent newer ways of droppin the content  
So your time is well spent

While you listen intently  
We stimulate you mentally  
Slicker than a plushed-out swingin a Bentley  
Once around the park with the clients  
We got it down (To a what?) To a science

(From downtown)  
(Science)

Let me talk about the the mo, the m.o., the mode of  
operation  
The technique employed to perform a occupation  
I'm makin ya stand firm in the beliefs  
Don't slip - get some cleats  
Cause schemin on you believe in is falsifyin  
So erectifyin justifyin a scientific proof, the truth  
Surroundin the issue, to make it official  
Once and for all  
Winter, spring, summer, or fall  
All you got to do is call  
Or beep, and be a sheep  
And we'll be the creep  
And you can be at us  
Sippin on a status that matters  
Flowin the way nature intended  
Non-stop until the service is rendered  
Quicker than a kitchen appliance  
We got it down (To a what?) To a science
