It takes my breath away
Every time that we talk
I want to be with him
Each day I'm not

Two years have passed
Still you're the only one
The only one who makes me laugh

Only you will love me
Only you can touch me
Only you will love me
Nobody else

The moonlight dances on
The window shadow's frame
And when the night is over
And it's time to say goodnight
I never wanna leave you
I never wanna leave you now

Ten years have passed
Still you're the only one
The only one that makes me laugh

Only you will love me
Only you can touch me
Only you will love me
Nobody else
Nobody else

Your years have passed
And you were the only one
The only one who made me laugh

Only you did love me
Only you did touch me
Only you did love me
Nobody else
