Thank you very much thank you well I love those old songs
Well you know I have recorded several songs
A couple of albums for little children
And I really like little children my mother had some
And everywhere I go I used to go pickin' and singin' at
country music shows
And I would see the kids come down to the front row of
the shows
And all I had to sing for them was I Like Beer
And I like that song but I thought it would be nice if I
had some other song
That I could sing for them
So I wrote two albums of childrens songs
And I've really made a lot of friends out of a lot of
beautiful little people
And I feel very blessed about that and very happy
about it
Because children of course are the future of country
music
And they're the future of America
And I'm glad to have 'em for friends because when
they take over they're
gonna like me
I don't know what they'll think about the rest of you
folks but they'll like me
I'm gonna sing this song this is my most requested
children's song here
And if any of you children wanna sing along on this well
you're perfectly
welcome
