Baby, she's a freak

She's a freak, a freak of ingenuity
A little misdemeanour, a sort of little felony
Baby, she's a freak, a real-life incongruity
No more monotonous homogeneity
She's a freak
Bless'd are the people when they produce a freak,
she's a freak
Bless'd are the people when they produce a freak,
she's a freak

She's a freak, a bona fide anomaly
Her alien vibrations assume a certain density
Baby, she's a freak, unusual phenomenon (Unusual
phenomenon)
Tuned-in and super turned-on, a modern paragon
She's a freak
Bless'd are the people when they produce a freak,
she's a freak
Bless'd are the people when they produce a freak,
she's a freak
Baby, she's a freak

Bless'd are the people when they produce a freak,
she's a freak, oblique
Bless'd are the people when they produce a freak,
she's a freak, unique
Bless'd are the people when they produce a freak,
she's a freak, oblique
Bless'd are the people when they produce a freak,
she's a freak, unique
Bless'd are the people when they produce a freak,
she's a freak, oblique
Bless'd are the people when they produce a freak,
she's a freak, unique
Bless'd are the people when they produce a freak
