The targets we have found here in this land
Women, elderly, and children
Are we brave? No I think we're all criminals
Afraid to stand for what is right and just

So now don't turn your back
Don't walk away from the blood you spilled today
You call yourself free
What you don't know is you're the enemy

1000 heads stare from graves on the street
is this what you would call liberty?
Freed from life by the bullets in your hand
Are you not human? Can't you understand?

Is it all the same?
It this just a game?
Let's go out to play
Shoot someone today
