I'm the greatest star
I am by far but no one seems to know....

I'M HOT!
I'm burning!
At a million degrees!
You feel - it solar energy!
You need it!
I make the flowers bloom
I make the plants green!
Without my burning baby
you could never breath!
Believe it!

I am the Sun! I am the Sun! I am the only one!
Sing praise to my golden rays! (feel it)
I am the center of the Solar System
you must obey my solar wisdom!

Rise and Shine I am the keeper of time!
Winter fall summer spring
I am the source of everything!
I gave birth to life on Earth!
I drag you through the galaxy
with the force of gravity!

I am the Sun! I am the Sun! I am the only one!
Sing praise to my golden rays! (feel it)
I am the center of the Solar System
you must obey my solar wisdom!

And I'll shine on you!

Sing praise to my golden rays! (feel it)
I am the center of the Solar System
you must obey my solar wisdom!
