Fade beauty .. dear teenage dream
I am riding to keep you
From feeling alone
These are my memories
Left here on paper
Take them let yourself know
That there is still a life time for you
And you can still grow
Don't cry you don't have to
Forget all the lies they have told you
Learn from the pain you have been through
No one I strong enough to break you
Ps you are still you
Trapped in the mistake you can't escape from
There is nothing out there you can't overcome
Ain't even half time why are you living
Who aid your game was done
She was your steady hand
Now she is an angel right up above
Don't cry you don't have to
Forget all the lies they have told you
Learn from the pain you have been through
No one I strong enough to break you
Ps you are still you
Surrounded by love I pull you up
You are never alone never alone never alone never
alone
Don't cry you don't have to
Forget all the lies they have told you
Learn from the pain you have been through
No one I strong enough to break you
Ps you are still you
Ps you are still you
.. love teenage dream
I wrote this to keep you
From feeling alone
