African Moon

Roll with the mighty waves

We'll be there soon

Feel the winds as we sail on home to African Moon

African Moon

My heart beats like the drum

Now it is noon

Loved ones we left behind I'll see again

African Moon

African Moon

I will see you once more

Yes again I'll adore the real sound of the drum

Oh yes I'm sailing feel your hot sun

African Moon

African Moon

Looking out to the sea

A reunion there'll be in the evening sun

Oh there's a new life that's awaiting me

African Moon

African Moon

This land is my rightful home

We'll never roam

You'll weep for your sons no more and daughters

African Moon

Hold up your head

One day you'll be understood

Stand and be proud

Your sorrows are gone for good

Hold up your head

And you'll be satisfied
