Written by Tommy Page and L. Russell Brown)

I fall to pieces when I hear your name  
Well my concentration somehow isn't the same  
I think about you from the moment I rise  
I see visions of you when I close my eyes  
No baby I, I can't see  
Living my life without you next to me

Chorus

Oh girl, I can't get you outta my mind  
Can't get you outta my mind  
Hey girl, I think about you all of the time  
And I can't get you outta my mind

Sometimes I wish that we could run away  
So we could be together every night and day  
I'd love to spend my whole life through  
On a tropical island all alone with you  
Oh we were meant to be  
In each other's arms for eternity

You know that I'll love you forever  
Wherever you are, no metter how far  
I'll hold you close inside my heart
