Tonight I wander carelessly
Through the tunnels of the ABC
I'm not lost its just that I need to be
clear of mind to dream

And a laser shoots another image through my eye
of a white square piercing a jet black sky
Then she floats down all pretty and bright
and we share a drink tonight
We share a drink tonight

Gimme a call, you've got a phone don't you
turn it on cause
I need to hear from you
do you know why
cause i saw something today that made it all come
it all came back to me

Gimme a call you've got a phone
don't you turn it on cause
I need to hear from you
do you know why
cause I saw something today that made it all come
it all came back to me

And she ain't stopping me tonight
cause I've reached that point in my life
well no one's stopping me tonight
cause I've reached that point in my life

There's beats and there's pulses and there's
rhythm in the soul
and I try to stand quite calmly as I lose control
see this girl was here
and she ain't no more
she loves this very floor
loves this very floor

Gimme a call
you've got a phone don't you turn it on cause
I need to hear from you

do you know why
cause I saw something today that made it all come
it all came back to me

Gimme a call
you've got a phone don't you turn on cause
I need to hear from you
do you know why
cause I saw something today that made it all come
it all came back to me

And she ain't stopping me tonight
cause I've reached that point in my life
well no one's stopping me tonight
cause I've reached that point in my life

Gimme a call
You've got a phone don't you turn on cause
I need to hear from you
do you know why
cause I saw something today that made it all come
it all came back to me
