It's just that when it's mentioned
Serves to remind again, so instead
thanks for the information
but let it die instead, and move on
This sovereign way's become trying now,
words like destined seem cheap somehow,
so give up and skirt around the core,
like a tour in the hotel brochure.

Took back the moment, now give back the time,
it's needed for another venture still undefined,
the fleeting power of the worthless win,
the bounty of the stubbornest player in this game.

This sovereign way's become trying now,
words like destined seem cheap somehow,
so give up and skirt around the core,
like a tour in a hotel brochure.
