Shout it from the rooftops
We weathered the storm
Now there's nothing in our way
Static on the airwaves is all but gone
Slowly fading away
I can see for miles and miles
Tonight
I can feel the change come and open up my eyes
From where I stand the earth it never ends or begins
No one
No fences
It felt just like a dark cloud
We could not run
Almost everywhere we turn
Never saw it coming down
But we live and we learn

And we all keep holding on
Now I can see for miles and miles
Tonight
I can feel the change come and open up my eyes
From where I stand the earth it never ends or begins
No one
No fences
Now I can see for miles and miles
Tonight
I know there's a change when I open up my eyes
From where I stand the earth it never ends or begins
No one
No fences
No fences
No fences
No fences
