"Forget"

Visit "[Forget](#)" on MotoLyrics.com

You only showed me how to bleed
These scars will last forever
But it won't break me

I hope you'll find yourself
And get even with your fucked up thoughts
Or this will break you

It's not a big mistake
This cannot last forever
I hide my tears
This can not last forever
And I leave you here
This cannot last forever
This cannot last forever

My heart
Won't change
For you
Time to forgive and forget

What's left to do?
Get away from you?
I've got nothing left to show

Cut me, I won't bleed
Still the scar will last forever
But it can't break me

I still believe in you
Please get even with you fucked up thoughts
Or this will kill you
