Walking through our streets, A stench of greed, watch  
their sin, A small price for trigger happy cities.  
Deceptions the key, Tease your mind, new perception.  
The patriot is what you see, the patriot is their show!

Take down the American dream, Take down the  
American dream, A chase for freedom, that freedom's  
lost

Here to protect! but who protects from them? I dont  
make the law, I just enforce it, But then the untouchable  
is touched, Bring us together, bring us our guns.  
Changes can be made, so bring on the masses! Bring  
on the masses!

Take down the American dream, Take down the  
American dream, A chase for freedom, that freedom's  
lost

Run for your life, youve got no place to go. Run for your  
life, you've got no place to go.

Why cant we see, around the war, the death, the  
shame

There must be a better way? (are we not civilized?)

There must be a better way? (are we not cultured?)

There must be a better way? (are we not caring?)

There must be a better way? (are we not human?)
