"We Are The Future"

Visit "[We Are The Future](#)" on MotoLyrics.com

Jesus aint my saviour, but Lordy lives on high, Dont
have to hold a faith, to see more in life, So keep it all
away from me I'll make up my own mind, I'll find my
own path, but wont be left behind. You live it...all to fast.

We are the future! We are the furtue!

Living fast your life runs past you'll never take it in,
You'll wish away your life one day and that's your fatal
sin, It's not all to do with what your body, thinks it
wants, Think a bit and you will see where I'm coming
from.

Mindlessness is not an option, so think of others, But
dont always follow suit, make a choice, Just slow down
and think of, a bigger picture! Not just now but all the
time of our world's future, And how it's affected...by
your waste.

We are the future! We are the furtue!

Living fast your life runs past you'll never take it in,
You'll wish away your life one day and that's your fatal
sin, It's not all to do with what your body, thinks it
wants, Think a bit and you will see where I'm coming
from.

We are the path way to a better future, A world
depends on us, so make a change! Let's rid the world
of it's thoughtless barriers, Use your own legs, dont let
them carry us!

Repeat with chorus overdubbed

No hate, No blame, No fight, No shame, No white, No
black, Our aim's the same!
