Please darling please, wont you save me from this Take me from the morgue with your kiss

Please darling please wont you save me I can no longer stand this place Arguments, shouting everywhere All I wanna do is to keep up my pace

But I cant really make it

[chorus]

Body and mind both cold as ice Take me to a faraway paradise Now, please darling please wont you save me from this Take me from the morgue with your kiss

Not dead but still not living
Not in danger yet not safe
A raincloud between me and happiness
The dead are walking in my nightmares
In my cold eternety
Like a newborn baby I will learn
To stay lost in a moment, and keep waiting for my long gone harmony

But I cant really make it

[chorus] x2

Take me from the morgue with your kiss...
