

Kills, The "Hand"

Visit "[Hand](#)" on MotoLyrics.com

I called her yesterday and she told me, that

Well, she was just talking me about the weather man on television

And I'd thought you'd be interested in knowing about this

It's pretty interesting, but well, well

Before they actually put the weather man on the television

With the weather board

They just put the weather man's hand pointing to stuff

And sometimes, they drew on the boards like

They would draw clouds as rain

And, sometimes they would draw maybe, lightning

And, and sometimes a sun if it was gonna' be sunny

But the thing that they did the weather man had to get

Get to the station early because

There was, they had to get make-up put on their hand
