I I I can't get full  
Please could you take my shakes  
And would you hold them still  
My words fell into the road  
I saw it starting to happen  
And I could not collect them, before they were rolled  
And I could not collect them, before they were rolled

You love...you love...you love... I hate the way you love  
I hate to way you love

May I look into the glass?  
Because I need some reflection  
Yeah, I know it won't last  
And look it's already over...  
I did not have the heart  
No I did not have the heart  
I was losing a button, right from the start  
I was losing a button, right from the start

You love...you love...you love...I hate the way you love  
I hate the way you love

I know I've seen you before  
You bored me then and now you just bored me some  
more  
The clock gets locked locked  
Tick-tick-tickticktick stop stop  
And now I can't get full  
Please could you take my shakes  
My eyes feel spikey and small  
And I can't get no picture on them at all
