Here we are on this black day
Sure we've been here before
Took the world for all that it's worth
Lost it for so much more
Our story has been told
Packaged up and sold
Now we want it back but we can't go back
Anymore

We know were doomed but we don't care
Breathing stopped blue blood in your veins
I can't stop it but I don't care
We can never go back
Anymore

Here we are and the suns gone
Sure we've seen this before
Only now, the sun won't return
Did we all want the darkness more?
Our story has been told
Packaged up and sold
The sky turns black
The heads roll back
And we're all gonna go
With the slam of the door

We know were doomed but we don't care
Breathing stopped blue blood in your veins
I can't stop it but I don't care
We can never go back

Sunsets over and the light it fades
The devil smiles on judgment day
The world is falling and we're all to blame
We can never go back
Anymore
