There's an apple in the pussy mouth

Now I am the dinner whore

There's a tumor in the T.V. mouth

Burn it out before it grows

Someone better get the dog to kick, jaws wired shut to

Save the dick

Out of the bottomless pit comes the little horn

"Little horn is born"

The world spreads its legs for another star

The world shows its face for another scar

Dead will dance for what is left

The worms will wait with baited breath

"Your blind have now become my deaf"

So says the little horn

"Save yourself from this....."

(chorus)

Everyone will suffer now...

"You can't save yourself..."

(chorus
