Intro,,
It seems that you came from no where
Somehow if you await to me
Soon as I turned away
And all you have to say

(Course)
That you won't be the same anymore
That you won't feel the pain anymore
That you won't love the same anymore
There is no way to feel the rain anymore
So now I lay here in your arms
So quiet and save
And all I have to say
(Course)

Soon as I closed my eyes
I see you face
Soon we know in time
The reason for this
And why don't we run away
(Course) X2
