"With A Friend You Know"

Visit "[With A Friend You Know](#)" on MotoLyrics.com

Day after day
I keep dreaming
I know you're with me
Even when I'm sleeping
As I walk on
With a jug full of hope
I know you're beside me
I'm not alone
You light a lantern in my soul
The light you shine
Guides me home
It guides me home

All my friends you know
Even if we fall
Crushing back down to earth I know

To the ends of universe we go
When you find the one
Who gets close enough
When the world around you is on fire
There always be a shining light
There always be a shining light

You cry at the wind
Cut through the mist
And brighten the way
The colours that you give
And the city lights
Are all shining now
That all of our plans
Are going work out
O-o-o don't you know they can
If you take my hand
And then I can see it
I can see it

All my friends you know
Even if we fall
Crushing back down to earth I know

To the ends of universe we go
When you find the one
Who gets close enough
When the world around you is on fire
There always be a shining light
There always be a shining light

I will follow anywhere you go
I 'll keep running fulltime through it all

All my friends you know
Even if we fall
Crushing back down to earth I know
To the ends of universe we go
When you find the one
Who gets close enough
When the world around you is on fire
There always be a shining light
There always be a shining light

Here we go
Crushing back to earth
To the ends of universe
Here we go
