Ever since you killed me
My spirit will not sleep
The way that you behaved
Summoned me back from the grave
Following in your footsteps, where you go
I'll go there too...

I will control your mind
When you go to sleep at night
Finally know you from within
And see your every sin
I'll be your silent witness and I'll judge you
For good or for bad...

With a ghostly scream
I will wake you from your dream
For your eyes I will manifest
And your cardiac arrest
Will finally free my soul and we will both rest
Rest in peace...
