Let me hold you once again  
Give me shelter now and then  
Till I find my way  
Looking down upon me now  
Coming out I don't know how  
Is it here to stay?

Throughout the night that follows the fight  
All heavens are falling now gilding each mortal brow  
Where are the heroes that arrive in the night  
Come back and let me know how to survive

Deep in the shadows alone in the cold  
The nightmare begins the horror unfolds  
Born out of darkness by masters of death  
It crawls through the night devours with its breath
